

Your Data, Your Language, Your Insights

With Ask Me Anything, your data speaks your language. We simplify complex queries to provide an experience that everyone can understand and use. In this new era, discovering your data is as easy as just asking.

ASK ME ANYTHING

Ask Me Anything is a cutting-edge software product that revolutionizes how businesses interact with their data. By allowing users to query their databases in natural language, Ask Me Anything simplifies the process of data retrieval, making technical expertise unnecessary for querying complex databases.

Key Benefits

Simplified Queries:

Users can ask questions in human language to quickly retrieve data without needing to learn complex query languages.

Reduced Need for Technical Skills:

Minimizes the involvement of IT staff in routine data queries, freeing them for more critical tasks.

Language Independence

Operates across different languages without the need for translation, facilitating seamless integration in diverse environments.

Use Cases

Scenarios

Regional Market Analysis

A marketing analyst plans a new product launch in Central Europe. The analyst wants to better understand the potential customer base in the region.

Product Compatibility Inquiry

A food manufacturer wants to assess the sales potential of apple-flavored beverages in the European market.

Product Certification Inquiry

A beverage distributor wants to meet the demand for halal-certified, non-alcoholic products in the Turkish market.

Query & Results

QUERY

"Find products suitable for customers based in Central Europe, with at least EUR 5 million in revenue and who spent EUR 200,000 last quarter."

RESULT

Ask Me Anything quickly identifies customers with the specified characteristics and provides a list of the most suitable products.

QUERY

"Find an apple-flavored beverage products sold in the food market for the Europe region."

RESULT

The system rapidly analyzes the market for apple-flavored beverages and provides information about market share, consumer preferences, and competitive conditions.

QUERY

"Find non-alcoholic products with a halal certificate in Turkey market."

RESULT

Ask Me Anything lists halal-certified and non-alcoholic products, providing details along with supplier information.

Technology and Development

Developed on the SAP Business Technology Platform,
Ask Me Anything leverages advanced technologies:

Programming Language

Python on
Cloud
Foundry
environment.

Database

PostgreSQL or
HANA Cloud
with Vector
Engine
optimized for
AI processes.

AI Models

Utilizes the
latest LLM
models from
SAP AI-Hub.

Target Audience

Ask Me Anything is versatile across various sectors, ideal for any organization looking to leverage artificial intelligence to enhance their data interaction processes without the need for extensive technical training.

Implementation Process

Each implementation of Ask Me Anything is tailored to the customer's needs, often starting with a Proof of Concept (PoC) to ensure it meets all requirements followed by an in-depth analysis of the integration.
